

Sports Premium Funding

April 21-March 22

£17,880 + £4745 unspent from 20-21

From March 2021, additional PE sessions were planned and delivered to ensure the children increased their fitness levels and re-engaged their enjoyment of PE after the impact of Covid upon the children's physical and mental health. The additional funding now carried over into this year's budget has paid for termly Bounce (trampoline) workshops (as requested by the children), as well as 2 GB athletes once again who visited Cobham during an amazing Sports and Health Week in July 2021. They were an inspiration to us all! The impact of greater levels of sporting opportunities can be seen in the data below collected during the school year 21-22 using our Golden Mile assessments. Average distance achieved by the children in every class improved term on term and one can see the impact of the

summer holiday on the children looking at the data analysed in the first term of 21-22, who once again seemed to have regressed in their fitness levels due to a lack of PE lessons and physical activity during the summer! Attendance last year continued to be high!

At the end of the March 22, 98% was our attendance figure with 74 pupils achieving 100% attendance so far this academic year! In Years 1 through to 6 – only 7 children currently are not meeting expected levels in PE! 80% of the whole school are expected + in PE. 50 % of our SEN children are exceeding In Years 1 to 6 During a monitoring pupil voice capture children commented ‘We love PE- we have done lots of new things this year and we have especially loved Bounce each term. It makes me use my own trampoline more at home!’
